	APPROVAL	OF STATE ENGINEER		
This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times. This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. (CONTINUED ON PAGE 2) The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to				
exce	eed	feet per second , but not to exceed 100 acre-feet		
ē	nnually non-consumptive use.			
		e completed on or before October 9, 1991		
Pro	of of completion of work shall be filed on or before	November 9, 1991		
Application of water to beneficial use shall be made on or before October 9, 1993		before October 9, 1993		
Pro	of of the application of water to beneficial use shall be	filed on or before		
		or beforeN/A

(PERMIT TERMS CONTINUED)

This permit is issued under the provisions of NRS 534.120(2) as a preferred use. The total combined duty of water under Permits 50039 and 54368 shall not exceed 222 acre-feet annually.

A report shall be submitted to the State Engineer at the end of the snow making season that describes how much water is pumped during the snow making season from this well and any other well used for snow making.
